FirmLipo

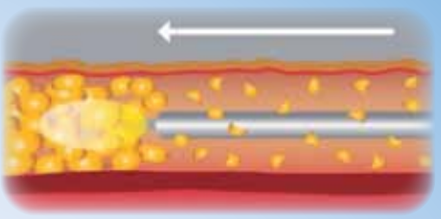
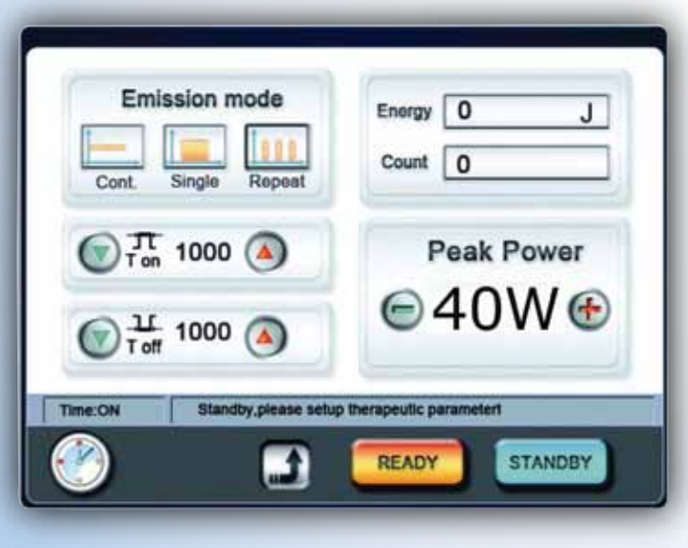
Laser lipolysis is the latest technology in fat reduction, which uses laser to dissolve fat, the cell membranes are broken up during this process. The thin fat lysate is released and it is either resorbed naturally or extracted manually by suction.The compatible operation kits for lipolysis by Pharmalase will provide a wide range of applications in body and a total new experience for patients.



- ✓ allows you to achieve body contouring with fewer contour deformities, smaller incisions, less bruising and less blood loss
- ✓ downtime is significantly reduced
- ✓ offers a minimally invasive body sculpting solution that safely "melts" fat away with less pain, less downtime and consistent aesthetic outcomes for your clients.
- ✓ gentle fat "melting" gives your clients smoother results with less contour deformities and skin irregularities typically seen with traditional liposuction and other laser-assisted lipolysis devices



Features:

- Super Frequency lead to less blood, less pain and precise treatment
- High quality and reliability
- Easy to handle
- Reasonable price
- Full accessory

Technical Specifications:

Wavelength	940 nm
Maximum Output Power	40W
Repetition Rate	0.5 – 500 Hz
Accessories	1 pc of 600 um fiber 1 pc of 400 um fiber 1 pc of fiber cutter 2 pcs of safety goggle 1 pc of footswitch

CE 0482
ISO13485:2003 93/42/EEC
